Class Descriptions

INTERVAL STRENGTH

An energizing and high tempo class that is designed to produce an 'after-burn' effect that can leave your metabolism operating at a higher level of efficiency for hours after you're done exercising.

FUNCTIONAL STRENGTH

This class uses a combination of dumbbells, kettle bells, resistance bands and body weight exercises. Combining core stability and full body functional strengthening exercises in a circuit format to leave you feeling balanced and strong. Functional strength training is not just done to improve your appearance, but can help you more efficiently undertake motions such as pushing, pulling, climbing, walking, sprinting, jumping, twisting, turning, to help you get better at regular day to day activities.

CORE FUSION

Integrating mind/body activities to improve your posture, strengthen your core, tone your muscles, build balance and increase flexibility, all while releasing tension and stress. It also integrates mind/body awareness by involving breathing techniques, attention to form, controlled exercise execution and mindfulness.

STRENGTH AND CORE

Using stability balls, small equipment and your own body weight, you'll tone, and sculpt your entire body to improve your overall fitness level.

PURE STRENGTH

This class includes a variety of weight bearing and loaded exercises, to increase muscular strength and coordination in a functional way. Participants will learn how to use their muscle groups in a way that helps prevent injuries and increases efficient muscular coordination.

PILATES

A method of exercise that consists of low impact movements designed to improve physical strength, flexibility and posture, as well as enhance mental awareness. This class will emphasize the use of the abdominal muscles whilst working the whole body in a series of mat-based exercises.

YIN YOGA (Last class is on May 25 until the Fall)

Gentle stretching and holds designed to open tight muscles and allow you to relax.
